- ✓ Can be dispersed from any orientation
- ✓ Safe to use at -10°C

EVERYDAY PEACE OF MIND

- ✓ Portable design
- ✓ Fast and effective fire safety for any fire emergency
- ✓ Small enough to keep close to any potential fire source

ONE EXTINGUISHER ANY TYPE OF FIRE NO CONFUSION

In the event that a fire were to start, do you know that different types of fires require specific types of fire extinguishers? Or that using the incorrect fire extinguisher can be extremely dangerous and could make the situation worse?

Would you even think to check this before using the first extinguisher in sight?

The reality is that the vast majority of people do not know the differences in fire types and fire extinguisher classifications, and for those that do, in the chaotic environment of a fire breaking out most wouldn't remember to check the classifications before using the closest fire extinguisher.

This is why we created the Zenova FX500. A fire extinguisher that is easy to operate, highly effective and safe for use on any type of fire.

It can reduce the confusion and stress associated with trying to find a fire extinguisher, checking that it is the correct type for the fire burning and then figuring out how to use it. Empowering anyone to be able to extinguish a fire before it becomes more destructive.

Tested and shown to be effective and safe to use on a lithium battery fire

Tested by independent experts and testing houses.
